Qvinci for Accountants Solution Roadmap

This document contains accounting best practices pertaining to the standardization and automation of styled reporting, consolidation of financial data, business intelligence and workflow management provisioned through a secure portal.

The Challenge

In today's competitive market, improving billable realization while increasing staff utilization and providing clients with actionable data through consultative services are initiatives for all accounting firms. Unfortunately, most firms are unaware a cloud solution exists that facilitates the automation of laborious manual tasks associated with styled reporting, data consolidation, business intelligence and workflow management, allowing them to cost-efficiently scale their business. Through engagement with large and mid-size accounting firms' leadership, many commonalities surfaced.

From the abridged list below, click the boxes to place a check mark in the areas that apply to your firm.

- □ We have an initiative to improve our realization rate while increasing staff utilization.
- We didn't realize that report standardization and automation is possible including its meaningful impact on a firm's efficiency, scalability and profitability.
- □ Each office does their own thing in terms of reporting.
- □ We do not have any documented QA standards for creating and publishing financial reports across our ecosystem.
- □ We have a concept or an objective regarding client portals as well as improving client value because everyone else is talking about it but we don't have well-defined plans of what it includes nor how to implement a viable solution.
- U We do not have enough qualified technologists on staff to implement and manage business intelligence solutions.
- We are not technology project people and have limited best practices for rolling out technology solutions across our ecosystem.

Firm leadership faces a daunting task in terms of identifying, developing and implementing solutions for the challenges above. This is further compounded now that firms of all size have implemented Qvinci based on the realization that they couldn't afford NOT to.

"Qvinci is scalable, easy to use, cost effective and deploys quickly. By automating the collection, reporting and benchmarking of data, Qvinci helps us improve productivity so we can spend more time adding exceptional value to our clients. On one recent client consolidation, it saved me days' worth of work."

Shane Bender President

The balance of this document focuses on the best practices other firms have adopted from discovery to implementation and beyond, and how our patented solution effectively addresses their challenges. Thank you for taking the time to gain a greater understanding of the power Qvinci delivers to the accounting profession.

Sincerely,

John F. Logan

John F. Logan EVP, Sales and Marketing Qvinci Software JohnL@qvinci.com

The Solution

Founded in 2007, Qvinci Software is the leader in providing automated cloud-based financial data consolidation, reporting, business intelligence and workflow management solutions to accounting firms that use QuickBooks[®], Xero[®], MYOB[®] or Excel[®]. We are the #1 rated reporting app in the Intuit App Store and are ProAdvisor recommended.

By automating the gathering, syncing and mapping of financial data from disparate sources, Qvinci delivers the multi-period reporting and actionable data needed to proficiently monitor and compare the performance of single and multi-unit organizations.

"The ability to customize financial reporting for our clients is key for our business. This financial reporting tool allows for consolidation with multi-location companies."

Kelly Johnson BDO Partner and National Practice Leader

Watch the three overview videos and discover how Qvinci's solution helps others in your industry:

- Increase billing realization
- Improve staff utilization
- Automate actionable client reporting and data consolidation
- Empower their accountants to be viewed by clients as business consultants

Also, feel free to visit our website for more in-depth insights.

Daily, we help accounting firms cost-effectively scale growth while providing clients with actionable financial reporting.

"Consolidating data from multiple entities and publishing standardized styled reports saves significant time. Dynamic mapping to a standard Chart of Accounts is a game changer."

> Michelle Long Founder Advanced ProAdvisor

The balance of the document will provide insight into our ability to provide equal value to your firm.

Solution Overview

Getting Started

If required, a 30-day paid Proof of Concept (POC) can be used to showcase the benefits derived from financial data consolidation and automated reporting. To ensure maximum value derived from your POC, Qvinci will build your standard templates, enabling you to immediately report for client entities.

Stage 1: Creating Standardized and Styled Report Templates

Most firms desire the ability to standardize the look of their reports as a component of their branding initiative. To address this requirement, Qvinci will build/publish (at a negotiated price) your specific standard report templates and/or JumpStart templates to your report library. These templates are comprised of the most common reports a client may need and are designed to provide the Client Champion(s) with a suite of ready-to-use options. The Client Champion will learn how to clone, update or customize these templates so that they best fit the needs of your firm.

The Qvinci JumpStart package includes over 40 reports. Some of the most commonly used include:

Profit & Loss

- This Calendar Year to Date; Monthly Frequency + Year Totals; % of Income
- This Calendar Year to Last Month; Monthly Frequency + Year Totals; % of Income
- Last Month vs Prior Month; Variances
- Last Month vs Same Period Prior Year; Current Year to Last Month vs Same Period Prior Year; Variances
- This Calendar Year to Last Month; by Entity + Totals; % of Income

Balance Sheet

- This Calendar Year to Date; Monthly Frequency
- This Calendar Year to Last Month; Monthly Frequency
- Last Month vs Prior Month; Variances

Cash Flow

- This Calendar Year to Date; Monthly Frequency
- Last Month vs Prior Month; Variances

NOTE:

Please email us your standard report package so we can determine what additional reports may need to be created for both your POC and future solution rollout.

Stage 2: Creating Custom Report Templates

Post-adoption, most Qvinci customers request that we build any specific custom reports and templates they require (at a negotiated price) that further facilitates their ability to fully utilize our solution. Alternatively, Client Champions may elect to build custom report templates themselves, however, this is only advised for advanced users.

Example 1: Profit & Loss with % of Income

A popular template is the Profit & Loss with % of Income. This report may be presented in a number of different ways but a monthly-delineated option is often required. The % of Income may be toggled off at any time or shown in one report versus another depending upon user preference.

Example 2: Profit & Loss by Entity

Templates may be created that deliver side-by-side and consolidated views of entities for clients who have more than one entity. Multi-entity clients may harness Qvinci's patented technology to create a Standard Chart of Accounts (SCoA) and map the incoming, disparate CoAs into the standard. Gone are the days of trying to maintain standard CoAs across multiple accounting files and manually performing consolidations. Instantly view side-by-side comparisons and consolidations in Qvinci. Additional toggles allow for % of income, benchmarking % and other variables to be quickly enabled on a comparison report.

1. Creating Your Rollout Strategy

In order to ensure we allocate the proper resources needed to onboard each of your offices and their respective Client Champions, Qvinci offers a best practice rollout strategy to facilitate adoption.

This phased rollout method provides a partnership program for each office and enables specified Client Champions to effectively setup and rollout clients, master templating and reporting capabilities, train additional users and serve as a leader in their organization for the Qvinci solution. As we move towards creating a rollout strategy for your firm, providing per office data (below) will help tremendously.

Onboarding with Excellence

2. Efficiently Executing Your Rollout Strategy

Qvinci's Champions Program facilitates best practices for onboarding, training and adoption. Client Champions are partnered with Qvinci Champions throughout the implementation and training phases as outlined below.

The Qvinci Champion's Program

 files set up in Qvinci and the rollout, onboarding, implementation, and training progress based upon the information derived from the Local Office Client Champions. f) Host training for Local Office Client Champions. g) Develop, implement and report on Client rollout, onboarding, implementation and training metrics and surveys throughout the account's lifecycle. h) If delays occur, liaise with the Firm Client Champion (and the Local Office Champions needed) to get the process back on track by communicating with the Firm Client Champion (and the Local Office Champions if needed) and to develop a plan of action and next step based on the contracted rollout schedule. i) Participate in periodic discussions with the Firm and Local Office Client Champion regarding managing and improving the Client's overall experience at every stage. 			of the Client, the Services described below. The obligations set forth below shall be jointly uly collaborative between Qvinci and Client.
 Support Representative Champion ("CSR") paired with an Account Executive Champion ("AE"). 2. The CSR and AE Champions will be responsible for and empowered (with the requisite authorin and reporting responsibility) to accomplish the following: convert Client account rollou onboarding, training and implementation feedback into actionable data and results; ensur appropriate account rollout, onboarding, implementation and training strategies are developed deployed, executed and monitored; make necessary adjustments to ensure desired Client result and improve the overall Client experience at every stage. 3. The CSR and AE Champions will: a) Ensure that the Client's experience is meaningful, impactful, and long term; managing an improving the Client's experience at every stage. b) Schedule and lead the Client kick-off meetings with the Firm Client Champion and Loc: Office Client Champion (see Section B.1. and B.2. below.) to schedule and plan the rollou onboarding, training and implementation conversations and agree to a granular timelin for execution based on the contracted rollout schedule. c) Collaborate with the Firm Client Champions on a weekly basis, asking for status updates or their rollout, onboarding, implementation, and training progress. e) Schedule and lead bi-weekly status call updates with the Firm Client Champion (and the Local Office Client Champions if needed) on the progress being made per office on the new clier files set up in Qvinci and the rollout, onboarding, implementation and training progress. e) Develop, implement and report on Client rollout, onboarding, implementation and training metrics and surveys throughout the account's lifecycle. h) If delays occur, liaise with the Firm Client Champions. g) Develop, implement and report on Client rollout, onboarding, implementation an training metrics and surveys throughout the account's lifecycle. h) If delays occur, liaise with the Firm Client Cham	The	Qvinc	i Customer Support Representative and Account Executive Champions

3. Client Champion(s) Training Overview

Setup and Basic Report Training

In the first phase of training a Client Champion will learn how to setup the account, add client companies, sync accounting files, setup additional users, and configure as well as map to a Standard Chart of Accounts (if applicable). Additionally, this phase of training encompasses navigation and usability.

The second phase revolves around basic reporting, templating and packaging of deliverables. Client Champions will learn the difference between a report and a template as well as how to configure both in Qvinci. Once sample templates are configured, a walkthrough of packaging multiple assets into a single deliverable will take place. Finally, Client Champions will understand the setup process as well as the beginnings of reporting, templating and packaging.

Custom Reporting Training

In the custom reporting training, Client Champions will further explore how to create dynamic templates in Qvinci's Report Editor by using macros to drive the datasets. During this training, Client Champions will learn best practices for creating custom formatted templates that service many clients as well as how to create specially designed reports for specific clients. At the end of this training Client Champions will have an initial suite of templates in the account, a skillset for expanding their Report Library, and a good understanding for best practices regarding custom reporting and templating.

QuickStart Document

quickbooks.

myob X

The QuickStart Document serves as a reference guide for Client Champions and provides answers to the most frequently asked questions relating to getting started, account maintenance, reporting and templating as well as other common topics. This document links to the Qvinci Knowledge Base for further insight and guidance.

Accountant QuickStart Documentation

Financial Impact

When it comes to providing automated financial consolidation, reporting and business intelligence solutions to accounting firms, Qvinci for Accountants is the industry leader. Its enhanced functionality and value-added reporting capabilities have made it the go-to cloud solution for accounting firms of all sizes.

This calculator illustrates how Qvinci will improve your realization rate and increase profits as we have done for many others. The green cells are populated with the averages provided by other firms. Please adjust them to reflect your firm's specifics.
